

The – 3 Minutes *Formula*

*Not the design.
The story.*

My designs kept
getting rejected.

*Until I changed
one thing!*

In Flashback....

Here's the new design!

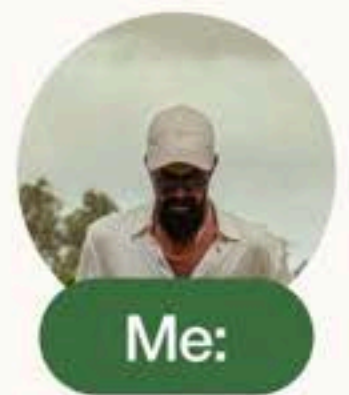

Let's see more options.

20% Success rate

After applying formula

We were losing 68% of users at checkout, about \$2M a year. The design I tested with users cut the flow from 4 minutes to just 90 seconds.

let's ship this!

85% Success rate

The Difference?

*I stopped
showing designs.
I started telling
stories.*

The 3-Mins story formula

Breakdown

Minute 1: The problem

*"We're losing
68%(\$2M) of users at
checkout" → Show the
pain with numbers +
user quotes*

Minute 2: The solution

*"Here's what we built
and why" → Walk
through the design
with real scenarios*

Minute 3: The proof

*"15 users tested it. 14
succeeded. Task time
dropped 60%" →
Show results, not
opinions*

Same Design!

Different Approach

Rejections dropped
from 70% to 15%

*Not because my designs
got better. Because my
reasoning got better.*

Please answer this before your next presentation

- 1. What's the problem? (in numbers)*
- 2. What did users say?*
- 3. What did you test?*
- 4. What were the results?*
- 5. What's the business impact?*
